Critical Pragmatic Studies on Chinese Public Discourse Xinren Chen,2019-09-16 Public discourse constitutes the language environment of a town or a city, which forms part of the social environment of a country or a region. Based on extensive first-hand data collected from public places, mass media and the Internet, this monograph attempts critical pragmatic studies of public discourse in the contemporary Chinese context. By applying pragmatic theories and analytical instruments to the analysis of the data, including business names, advertisements, public signs and notices, and news, the book showcases such discursive practices as personalization and subjectivization and reveals such social problems as unhealthy social mentalities, "pragmatic traps", suspect discrimination, and vulgarity. It exemplifies a way of combining the Critical Discourse Analysis (CDA) approach and the pragmatic approach with a clear focus on the pragmatic issues. This book will not only be a necessary addition to the academic discipline of pragmatics in general, and critical pragmatics in particular, but also lay bare the problems existing in the use of public discourse and suggest several ways to improve such use. While it addresses the Chinese data only, the proposed analyses may contribute to international readers' understanding of public discourse in contemporary China and serve as a reference for similar researches worldwide.

Advertising Language Keiko Tanaka,2005-07-05 Keiko Tanaka offers an analysis of the linguistic devices that are used in advertisements, looking at the strategems which advertisers employ to gain and retain the attention of their audience. Using relevance theory as a framework, she sets out its key aspects and applies them to the language of written advertising in Britain and Japan. Particular emphasis is placed on `covert communication', puns and metaphors, and the book contains a unique chapter on images of women in Japanese advertising. It is fully illustrated throughout with recent contrasting

advertisements drawn from the two countries. The book provides a compelling analysis of the language of advertising, and an exploration of Relevance Theory that will be of interest to scholars in many fields.

Foundations of Pragmatics Wolfram Bublitz,Neal R. Norrick,2011 Opening the 9-volume-series Handbooks of Pragmatics, this handbook provides a comprehensive overview of the foundations of pragmatics. It covers the central theories as well as concepts and topics characteristic of mainstream pragmatics, i.e. the most widespread approach to the ways and means of using language in authentic social contexts. The articles provide both state of the art reviews and critical evaluations of research in pragmatics. Topics are thus not only considered within their scholarly context but are also critically evaluated from current perspectives.

The Language of Advertising Angela Goddard,2002 Drawing on literary and linguistic theory for analysis of texts, this book covers all aspects of advertising language, from the interrelation of language, image and layout to the discourse between 'reader' and advertisement.

Doing Pragmatics Peter Grundy,2013-11-26 Doing Pragmatics achieved success through its unparalleled capacity to render pragmatics truly accessible to students. Embracing the comprehensive and engaging style which characterised the previous editions, the third edition is fully revised and expanded. Grundy consolidates the strengths of the original version, reinforcing its unique combination of theory and practice with new theory, exercises and up-to-date, real data and examples. New chapters include pragmatic inference and language evolution, and intercultural pragmatics. Doing Pragmatics is designed for pragmatics courses both at an introductory and a more advanced level. It extends beyond theory to promote an applied understanding of empirical data and to provide students with the opportunity to 'do' pragmatics themselves, providing the ideal foundation for all those studying linguistics and ELT.

Cyberpragmatics Francisco Yus,2011-08-22 Cyberpragmatics is an analysis of Internet-mediated communication from the perspective of cognitive pragmatics. It addresses a whole range of interactions that can be found on the Net: the web page, chat rooms, instant messaging, social networking sites, 3D virtual worlds, blogs, videoconference, e-mail, Twitter, etc. Of special interest is the role of intentions and the quality of interpretations when these Internet-mediated interactions take place, which is often affected by the textual properties of the medium. The book also analyses the pragmatic implications of transferring offline discourses (e.g. printed paper, advertisements) to the screen-framed space of the Net. And although the main framework is cognitive pragmatics, the book also draws from other theories and models in order to build up a better picture of what really happens when people communicate on the Net. This book will interest analysts doing research on computer-mediated communication, university students and researchers undergoing post-graduate courses or writing a PhD thesis. Pragmatics in Translation Daria Dayter,Miriam A. Locher,Thomas C. Messerli,2023-03-31 This Element addresses translation issues within an interpersonal pragmatics frame. The aims of this Element are twofold: first, we survey the current state of the field of pragmatics in translation; second, we present the current and methodologically innovative avenues of research in the field. We focus on three pragmatics issues – relational work, participation structure, and mediality – that we foreground as promising loci of research on translational data. By reviewing the trajectory of pragmatics research on translation/interpreting over time, and then outlining our understanding of the Pragmatics in Translation as a field, we arrive at a set of potential research questions which represent desiderata for future research. These questions identify the paths that can be productively explored through synergies of the linguistic pragmatics framework and translation data. In two case study chapters, we offer two example studies addressing some of the questions we identified as suggestions for future research. This title is also available as Open Access on Cambridge Core.

Idiomatic Creativity Andreas Langlotz,2006-04-15 This book revisits the theoretical and psycholinguistic controversies centred around the intriguing nature of idioms and proposes a more systematic cognitive-linguistic model of their grammatical status and use. Whenever speakers vary idioms in actual discourse, they open a linguistic window into idiomatic creativity – the complex cognitive processing and representation of these heterogeneous linguistic constructions. Idiomatic creativity therefore raises two challenging questions: What are the cognitive mechanisms that underlie and shape idiom-representation? How do these mechanisms define the scope and limits of systematic idiom-variation in actual discourse? The book approaches these problems by means of a comprehensive cognitive-linguistic architecture of meaning and language and analyses them on the basis of corpus-data from the British National Corpus (BNC). Therefore, Idiomatic Creativity should be

of great interest to cognitive linguists, phraseologists, corpus linguists, advanced students of linguistics, and all readers who are interested in the fascinating interplay of language and cognitive processing.This book has a companion website: www.idiomatic-creativity.ch.

Pragmatics in Persuasive Discourse of Spanish Television Advertising Karol J. Hardin,2001 This investigation analyzes pragmatic ways in which Spanish is used to achieve persuasion in television advertising. The author applies pragmatic models to commercials for products and services from three countries--Chile, Spain, and the United States. She addresses the questions: (1) Which pragmatic devices occur most frequently? (2) How are these devices linguistically coded? (3) Are any differences evident between regional varieties of Spanish? and (4) How are pragmalinguistic features of television advertising used to effect persuasion? The most representative variables include speech acts, indexicals, politeness, implicatures, violations of Grice's Maxims, and speaker considerations. The study contributes to the cross-linguistic understanding of pragmatics and of persuasion in Spanish by (1) offering a procedure that may be replicated; (2) addressing multiple pragmatic categories; and (3) examining the relationship between pragmatic strategies and persuasion among Spanish speakers. Given the vital role of the media in society, Spanish television advertising reflects the pragmatic communication of persuasion by and to Spanish speakers. Pragmática de discurso persuasivo de publicidad de television en español. Esta investigación analiza las maneras pragmáticas en las cuales se usa el español para persuadir en la publicidad de televisión y contribuye al entendimiento lingüístico de pragmática y persuasión en español.
