Principles Ray Dalio, 2018-08-07 #1 New York Times Bestseller "Significant...The book is both instructive and surprisingly moving." —The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve

meaningful work and meaningful relationships through radical transparency.” It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what he’s learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book’s hundreds of practical lessons, which are built around his cornerstones of “radical truth” and “radical transparency,” include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating “baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, *Principles* also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they’re seeking to achieve. Here, from a man who has been called both “the Steve Jobs of investing” and “the philosopher king of the financial universe” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you’ll find in the conventional business press.

Beyond the J Curve Thomas Meyer,Pierre-Yves Mathonet,2011-02-15 In recent times, venture capital and private equity funds have become household names, but so far little has been written for the investors in such funds, the so-called limited partners. There is far more to the management of a portfolio of venture capital and private equity funds than usually

perceived. Beyond the J Curve describes an innovative toolset for such limited partners to design and manage portfolios tailored to the dynamics of this market place, going far beyond the typical and often-simplistic recipe to 'go for top quartile funds'. Beyond the J Curve provides the answers to key questions, including: Why 'top-quartile' promises should be taken with a huge pinch of salt and what it takes to select superior fund managers? What do limited partners need to consider when designing and managing portfolios? How one can determine the funds' economic value to help addressing the questions of 'fair value' under IAS 39 and 'risk' under Basel II or Solvency II? Why is monitoring important, and how does a limited partner manage his portfolio? How the portfolio's returns can be improved through proper liquidity management and what to consider when over-committing? And, why uncertainty rather than risk is an issue and how a limited partner can address and benefit from the fast changing private equity environment? Beyond the J Curve takes the practitioner's view and offers private equity and venture capital professionals a comprehensive guide making high return targets more realistic and sustainable. This book is a must have for all parties involved in this market, as well as academic and students.

Communities in Action National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Community-Based Solutions to Promote Health Equity in the United States,2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

World's Transition Toward A Green Economy: Achieving The United Nations' Sustainable Development Goals And

Promoting The Role Of Green Finance Xugang Yu, Mario Tettamanti, Cristiano Rizzi, 2023-10-04 This book treats different themes which are intrinsically linked and of extreme significance for the entire global community such as the necessity to cut emissions and transit toward a more sustainable and green economy. The content extends to the urgency to shape a new multilateralism and reinforce cooperation to achieve global goods, where the environment comes first, to the green finance which will play a fundamental role for the green transition paying particular attention to the United Nations' 2030 Agenda for Sustainable Development. A particular emphasis is given to the so-called 'Dual Circulation Strategy' (DCS) which is presently becoming the priority not only for China but also for the rest of the global community. Due to the uncertainties caused by the pandemic and other external factors, China has substituted GDP growth with the so-called six guarantees (liù bǎo 六保) which represent the six fundamental aspects of the economy and society that according to the central government must receive priority attention, and protection in economic policy to ensure economic recovery. China also introduced the concept of an 'ecological civilization' (shēngtài wénmíng 生态文明) through green, low-carbon economic development. One of the targets is to achieve carbon neutrality before 2060, though the rest of the global community and in particular the European Union with its Green Deal, and the US with its renewed climate policies, are pushing to reach this objective in 2050. In order to grant all these developments, 'green finance' plays a fundamental role for the success of this green transition. Therefore, a substantial part of this book explores the many aspects surrounding this theme. Due to renewables playing a very important role in the green transition, the final part of this book explores investment opportunities related to the development of these alternative sources of energy.

The Law and Business of Litigation Finance assists various parties, including: - Those who do not have the resources or risk appetite to proceed in litigation or arbitration without financial support - Law firms who are interested in a significant business development opportunity, and fairer outcome for litigants - Insolvent estates, whose biggest assets are their potential claims - Judges, arbitrators and other neutral parties in funded dispute resolution cases - Regulators, legislators and policymakers in the fields of legal and financial services - Investors who seek high risk, high return opportunities The book is edited by one of the most accomplished litigation funders in the international market and has contributions from leading experts drawn from legal practice, financiers and academia. funding industry, with reference to Australia, New Zealand and other select jurisdictions. Global Capital Flows to Infrastructure Investments Joseph B. Oyedele, 2014-02-17 The demand pressure and the plethora of evidences observed in the form of increasing infrastructure financing gap, ageing infrastructure, environmental factors, such as climate change and rising quality standards are factors attracting institutional and private sector participation in infrastructure investment. Therefore, the search for innovative means of financing infrastructure has become incessant. Also, the features of the financial landscape, especially in a financial crisis has further underpinned the significance of looking beyond the present infrastructure need, to a more sustained infrastructure financing scheme anticipated from institutional investors. A well established capital market has therefore been identified as a viable option for long term and steady global capital flows to financing infrastructure projects; else, the burden will remain on governments to offer direct or indirect support to private investors in attracting financing for infrastructure development. This book therefore conceptually investigates the potentials of the capital market and institutional investors' capital flows in bridging the global infrastructure funding gap. A fundamental conclusion from the book revealed that institutional investors particularly pension funds have the capacity to pool enormous resources into the infrastructure market, thus emphatically projecting them as a force to be reckoned with in the global infrastructure investments.

The three areas of banking institutions, online lending marketplaces, and money and payment systems are explored to assess how financial innovations affect the traditional financial industry, what kinds of regulatory challenges arise, and how global policymakers react to such challenges. With in-depth and international case studies on Fintech, including app-based banking services, mobile payments, P2P lending, and cryptocurrencies, the global Fintech hubs in six continents are assessed. The complex, dynamic, and multidimensional Fintech ecosystem is also investigated including its key players (such as regulatory strategy, regulatory sandbox, and RegTech) and Fintech corporations (including financial holding companies, Fintech unicorns, BigTech firms, and Metaverse platforms). Lu highlights the enormous benefits for financial institutions and their consumers and argues that Fintech contributes to a more equal, democratic, inclusive, and sustainable financial system. However, he also considers the risks and multiple legal, ethical, and regulatory challenges for policy-makers and financial authorities that Fintech has posed.
