Helping School Refusing Children and Their Parents Christopher Kearney, 2008-03-19 Children who miss substantial amounts of school pose one of the most vexing problems for school officials. In many cases, school personnel must assess these students and successfully help them to return to the academic setting. This can be difficult considering most school-based professionals are pressed for time and do not have access to proper resources. The information in this book can help school officials combat absenteeism and reduce overall dropout rates. Designed for guidance counselors, teachers, principals and deans, school psychologists, school-based social workers, and other school professionals, this book outlines various strategies for helping children get back to school with less distress that can easily be implemented in schools. The book describes four clinical interventions that can be used to effectively address moderate cases of absenteeism, as well as instructions for adapting these procedures for use within the school system. A chapter on assessment describes several methods for identifying school refusal behavior, including time-limited techniques for school officials who have little opportunity to conduct detailed evaluations. Worksheets for facilitating assessment are included and can easily be photocopied from the book. Other chapters provide advice for working collaboratively with parents, preventing relapse, and tackling special issues such as children with anxiety, children who take medication, and children who are victims of bullying. Topics such as poverty, homelessness, teenage pregnancy, violence, and school safety are also addressed.

*School Refusal Behavior in Youth* Christopher A. Kearney, 2001-01-01 Annotation Kearney, a clinical child psychologist at the U. of Nevada, Las Vegas, has written his book mainly with the school psychologist in mind. Carroll, 2014-05-20 *Unwillingly to School* discusses the neurotic problem of a phobic nature which inclines to manifest itself towards the recurring need to pass from home to the socially more structured and demanding environment of school. **When Children Refuse School** Christopher A. Kearney, Anne Marie Albano, 2007-03-29 School refusal behavior is a common and difficult problem facing parents of children and teenagers. The behavior can have severe consequences by contributing to a child's academic, social, and psychological problems. A child's absence from school can also significantly increase family conflict. If your child experiences anxiety or noncompliance about attending school and has trouble remaining in classes for an entire day, this workbook, and the corresponding Therapist Guide, can help. This Parent Workbook is designed to help you work with a qualified therapist to resolve your child's school refusal behavior. The Workbook outlines four possible treatment procedures that may be prescribed by a therapist, depending on your child's reasons for refusing school. Scientific evidence has shown these programs to be highly effective in treating youth 5-17 years old who exhibit school refusal behavior. Regardless of whether your child refuses school to relieve school-related distress, to avoid negative social situations at school, to receive attention from you or another family member, or to obtain tangible rewards outside of school, the flexible treatments described in this book will help you and your child overcome school refusal behavior. The Workbook describes what you can expect during your child's assessment and treatment and provides answers to questions you may have about the process. It also provides instructions for continuing certain aspects of the program at home, including relaxation and breathing techniques, as well as exposure exercises to decrease your child's anxiety. Instructions are also given for completing daily logbooks with your child to track progress, creating a morning routine to keep you both on schedule, and developing written contracts to enhance attendance and discourage nonattendance. With this user-friendly manual, you can take an active role in your child's successful return to school.

**When Children Refuse School** Christopher A. Kearney, Anne Marie Albano, 2018-07-30 Many children and teenagers refuse to attend school or have anxiety-related difficulties remaining in classes for an entire day. School refusal behavior can contribute to a child's academic, social, and psychological problems, impact a child's chances for future educational, financial, and personal success, and significantly affect family functioning. Cognitive Behavioral Therapy (CBT) has been shown to be a highly effective treatment for youth who exhibit this behavior. The third edition of When Children Refuse School, Therapist Guide, provides an updated multi-tiered approach model that can be used to effectively address the main

types of school refusal behavior. The Guide introduces new material on very severe and chronic cases of problematic absenteeism, including alternative educational avenues and expansion of manual procedures, for children and adults. This manual includes tools for assessing a child's reasons for school refusal behavior and is based on a functional, prescriptive model. It presents well-tested techniques arranged by function to tailor treatment to a child's particular characteristics. Each treatment package also contains a detailed discussion of special topics pertinent to treating youths with school refusal behavior, such as medication, panic attacks, and being teased. A corresponding workbook is also available for parents, who often play an important part in a child's recovery. This comprehensive program is an invaluable resource for clinicians treating school refusal behavior.

**The Thriving Adolescent** Louise L. Hayes, Joseph V. Ciarrochi, 2015-11-01 Adolescents face unique pressures and worries. Will they pass high school? Should they go to college? Will they find love? And what ways do they want to act in the world? The uncertainty surrounding the future can be overwhelming. Sadly, and all too often, if things don't go smoothly, adolescents will begin labeling themselves as losers, unpopular, unattractive, weird, or dumb. And, let's not forget the ubiquitous 'not good enough' story that often begins during these formative years. These labels are often carried forward throughout life. So what can you do, now, to help lighten this lifelong burden? The Thriving Adolescent offers teachers, counselors, and mental health professionals powerful techniques for working with adolescents. Based in proven-effective acceptance and commitment therapy (ACT), the skills and tips outlined in this book will help adolescents and teens manage difficult emotions, connect with their values, achieve mindfulness and vitality, and develop positive relationships with friends and family. The evidence-based practices in this book focus on developing a strong sense of self, and will give adolescents the confidence they need to make that difficult transition into adulthood. Whether it's school, family, or friend related, adolescents experience a profound level of stress, and often they lack the psychological tools to deal with stress in productive ways. The skills we impart to them now will help set the stage for a happy, healthy adulthood. If you work with adolescents or teens, this is a must-have addition to your professional library.

**When Children Refuse School: A Cognitive-Behavioral Therapy Approach - Parent Workbook** Christopher A. Kearney, Anne Marie Albano, 2000 This program is a unique prescriptive model for the treatment of school refusal behavior of children ages 5 to 17. Using a two-component program, this model divides the school refusal behavior into four basic groups based on the reasons why children refuse school: avoidance of school situations that provoke general negative affectivity;

escape from aversive social/evaluative situations; attention; and positive tangible reinforcement. Use it with children who are completely absent from school, who attend but then leave school during the day, who go to school following intense morning behavioral problems, or who display unusual distress during school days leading to pleas to parents or others for future non-attendance.
