La jihad. Teoria e pratica Michael Bonner,2008

*Islam* Carole Hillenbrand,2015-02-09 Carole Hillenbrand's book offers a profound understanding of the history of Muslims and their faith, from the life of Muhammad to the religion practised by 1.6 billion people around the world today. Each of the eleven chapters explains a core aspect of the faith in historical perspective, allowing readers to gain a sensitive understanding of the essential tenets of the religion and of the many ways in which the present is shaped by the past. It is an ideal introductory text for courses in Middle Eastern studies, in religious studies, or on Islam and its history.

**The Meaning of Life and Death** Michael Hauskeller,2019-09-19 What is the point of living? If we are all going to die anyway, if nothing will remain of whatever we achieve in this life, why should we bother trying to achieve anything in the first place? Can we be mortal and still live a meaningful life? Questions such as these have been asked for a long time, but nobody has found a conclusive answer yet. The connection between death and meaning, however, has taken centre stage in the philosophical and literary work of some of the world's greatest writers: Fyodor Dostoyevsky, Leo Tolstoy, Soren Kierkegaard, Arthur Schopenhauer, Herman Melville, Friedrich Nietzsche, William James, Ludwig Wittgenstein, Marcel Proust, and Albert Camus. This book explores their ideas, weaving a rich tapestry of concepts, voices and images, helping the reader to understand the concerns at the heart of those writers' work and uncovering common themes and stark contrasts in their understanding of what kind of world we live in and what really matters in life.

Understanding Jihad David Cook,2005-05-23 Jihad is one of the most loaded and misunderstood terms in the news today. Contrary to popular understanding, the term does not mean holy war. Nor does it simply refer to the inner spiritual struggle. This book, judiciously balanced, accessibly written, and highly relevant to today's events, unravels the tangled historical, intellectual, and political meanings of jihad. Looking closely at a range of sources from sacred Islamic texts to modern interpretations, *Understanding Jihad* opens a critically important perspective on the role of Islam in the contemporary world. As David Cook traces the practical and theoretical meanings of jihad, he cites from scriptural, legal, and newly translated texts to give readers a taste of the often ambiguous information that is used to construct Islamic doctrine. He looks closely at the life and teaching of the Prophet Muhammad and at the ramifications of the great Islamic conquests in 634 to 732 A.D. He sheds light on legal developments relevant to fighting and warfare, and places the internal, spiritual jihad within the larger

context of Islamic religion. He describes some of the conflicts that occur in radical groups and shows how the more mainstream supporters of these groups have come to understand and justify violence. He has also included a special appendix of relevant documents including materials related to the September 11 attacks and published manifestoes issued by Osama bin Laden and Palestinian suicide-martyrs.

**Negotiating Culture Through Comics** Maciej Sulmicki,2014-02-19 Are comic books the novel of the twenty-first century? Accessible and touching upon serious subjects, they mediate culture in a way compatible with today's fast-paced world. This volume explores the manifestations and functions of the medium in various parts of the global community.

**The Oxford Handbook of European Legal History** Heikki Pihlajamäki,Markus D. Dubber,Mark Godfrey,2018-06-28 European law, including both civil law and common law, has gone through several major phases of expansion in the world. European legal history thus also is a history of legal transplants and cultural borrowings, which national legal histories as products of nineteenth-century historicism have until recently largely left unconsidered. The Handbook of European Legal History supplies its readers with an overview of the different phases of European legal history in the light of today's state-of-the-art research, by offering cutting-edge views on research questions currently emerging in international discussions. The Handbook takes a broad approach to its subject matter both nationally and systemically. Unlike traditional European legal histories, which tend to concentrate on heartlands of Europe (notably Italy and Germany), the Europe of the Handbook is more versatile and nuanced, taking into consideration the legal developments in Europe's geographical fringes such as Scandinavia and Eastern Europe. The Handbook covers all major time periods, from the ancient Greek law to the twenty-first century. Contributors include acknowledged leaders in the field as well as rising talents, representing a wide range of legal systems, methodologies, areas of expertise and research agendas.

**The Crowd** Gustave Le Bon,1897

**Islam and the Divine Comedy** Miguel Asin Palacios,2013-10-16 When first published in 1926 this book aroused much controversy. The theory expounded in the book was that Islamic sources in general, and the writings of Ibn al-`Arabi in particular, formed the basis of Dante's poem Divine Comedy, the poem which symbolised the whole culture of medieval Christianity. The book shows how fundamental Muslim legends of the nocturnal journey and of the ascension of the Prophet

Muhammed appear in Dante's writings.

**The Turns of Translation Studies** Mary Snell-Hornby, 2006-06-09 What's new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many "new" ideas actually go back well into the past, and the German Romantic Age proves to be the starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.

**Introduction to Islam** Zahid Aziz, 2015-04-16 There has been a great demand for a booklet to introduce younger people to the teachings of Islam in fairly simple language. The Ahmadiyya Anjuman Isha'at Islam Lahore has, over the past decades, produced a range of excellent works dealing with all aspects of Islam. This literature has been widely appreciated and acclaimed as meeting the needs of the present times, both for teaching Muslims and for presenting Islam to the world generally. It has been felt for sometime that the wonderful knowledge contained in these comprehensive works must be made more readily accessible to younger people by presenting it at an introductory level in simpler language. This booklet has therefore been prepared to satisfy these requirements. All the basic doctrines and practices of Islam have been covered, supplemented by information about the Holy Quran, Hadith, and the moral teachings of Islam. No prior knowledge is assumed. The question-answer format used, it is hoped, will make the booklet more interesting than would be the case with a descriptive approach. There are abundant, direct quotations from the Holy Quran throughout with full references. In some places the teachings of Islam are elaborated in general words, without direct quotations or specific references, as this was not considered necessary in those cases in an introductory booklet of this kind. For further reading on any point, or fuller explanation, the writings of Maulana Muhammad Ali should be consulted. In any case, as younger readers advance in their knowledge, they would be expected to move on to these standard books.

**The Crusades** Carole Hillenbrand, 2000 This comprehensive work of cultural history gives us something we have never had: a view of the Crusades as seen through Muslim eyes. With breathtaking command of medieval Muslim sources as well as the vast literature on medieval European and Muslim culture, Carole Hillenbrand has produced a book that shows not only how the Crusades were perceived by the Muslims, but how the Crusades affected the Muslim world - militarily, culturally, and psychologically. As the author demonstrates, that influence continues now, centuries after the events. In *The Crusades*

the reader discovers how the Muslims reacted to the Franks, and how Muslim populations were displaced, the ensuing period of jihad, the careers of Nur al-Din and Saladin, and the interpenetration of Muslim and Christian cultures. Stereotypes of the Franks in Muslim documents offer a fascinating counter to Western views of the infidel of legend. For readers interested in the Middle Ages, military history, the history of religion, and postcolonial studies, *The Crusades* opens a window onto a conflict we have only viewed from one side. *The Crusades* is richly illustrated, with eighteen color plates and over five hundred line drawings and black and white photographs.

**Global Political Islam** Peter Mandaville, 2010-07-02 An accessible and comprehensive account of the global dimensions of political Islam in the twenty-first century, explaining political Islam, nationalism and globalization and providing a detailed account of Al Qaeda.

Misunderstanding Terrorism Marc Sageman, 2017 *Misunderstanding Terrorism* provides a striking reassessment of the scope and nature of the global neo-jihadi threat to the West. The post-9/11 decade experienced the emergence of new forms of political violence and new terrorist actors. More recently, Marc Sageman's understanding of how and why people have adopted fundamentalist ideologies and terrorist methods has evolved. Author of the classic *Understanding Terror Networks*, Sageman has become only more critical of the U.S. government's approach to the problem. He argues that U.S. society has been transformed for the worse by an extreme overreaction to a limited threat—limited, he insists, despite spectacular recent incidents, which he takes fully into account. Indeed, his discussion of just how limited the threat is marks a major contribution to the discussion and debate over the best way to a measured and much more effective response.

**Islam, Secularism, and Liberal Democracy** Nader Hashemi, 2009-04-08 Islam's relationship to liberal-democratic politics has emerged as one of the most pressing and contentious issues in international affairs. In *Islam, Secularism, and Liberal Democracy*, Nader Hashemi challenges the widely held belief among social scientists that religious politics and liberal-democratic development are structurally incompatible. This book argues for a rethinking of democratic theory so that it incorporates the variable of religion in the development of liberal democracy. In the process, it proves that an indigenous theory of Muslim secularism is not only possible, but is a necessary requirement for the advancement of liberal democracy in Muslim societies.

*Sapiens* Yuval Noah Harari, 2015-02-10 New York Times Readers' Pick: Top 100 Books of the 21st Century New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity

pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

*Far from Mogadishu* Shirin Ramzanali Fazel, 2016-04-15 There was time when my country was the country of fairy tales, a country where every child would want to grow and play. This is the story of the author's physical and emotional journey from her war-torn homeland, Somalia. Some time after the military coup in 1969 Shirin left Mogadishu and moved to Italy to make a new life and home for herself and her family. Since then she has crossed continents and lived in several cities, facing the challenge of integrating with many different kind of society before settling in England in 2010. This book encapsulates her reflections on the Somali diaspora.
