Adult Education in China Carman St John Hunter,Martha McKee Keehn,2018-08-06 Originally published in 1985. China is currently making a massive effort to educate its workforce in a formal and structured system. A good deal has been written about China's attempts, since 1949, to eradicate illiteracy and to universalise primary and secondary school education but the subject of this book is an educational system established to meet the needs of those already employed whether in government, industry or agriculture. Two study teams, sponsored by the International Council for Adult Education, visited China in 1981 to explore this educational phenomenon. Their findings, updated by subsequent ICAE visits and enriched by further reading, form the basis of this book. This is the story of the Chinese experience of developing adult education. It will be valuable to those involved in extending education in the industrialised world who are pursuing modernisation goals for people long excluded from the formal education system.

Reading and Writing V. S. Naipaul,2000-02-28 I was eleven, no more, when the wish came to me to be a writer; and then very soon it was a settled ambition. But for the young V. S. Naipaul, there was a great distance between the wish and its fulfillment. To become a writer, he would have to find ways of understanding three very different cultures: his family's half-remembered Indian homeland, the West Indian colonial society in which he grew up, and the wholly foreign world of the English novels he read. In this essay of literary autobiography, V. S. Naipaul sifts through memories of his childhood in Trinidad, his university days in England, and his earliest attempts at writing, seeking the experiences of life and reading that shaped his imagination and his growth as a writer. He pays particular attention to the traumas of India under its various conquerors and the painful sense of dereliction and loss that shadows writers' attempts to capture the country and its people in prose. Naipaul's profound reflections on the relations between personal or historical experience and literary form, between the novel and the world, reveal how he came to discover both his voice and the subjects of his writing, and how he learned to turn sometimes to fiction, sometimes to the travel narrative, to portray them truthfully. Along the way he offers insights into the novel's prodigious development as a form for depicting and interpreting society in the nineteenth century and its diminishing capacity to do the same in the twentieth. A task that, in his view, passed to the creative energies of the early

cinema. As a child trying to read, I had felt that two worlds separated me from the books that were offered to me at school and in the libraries: the childhood world of our remembered India, and the more colonial world of our city. ... What I didn't know, even after I had written my early books of fiction ... was that those two spheres of darkness had become my subject. Fiction, working its mysteries, by indirections finding directions out, had led me to my subject. But it couldn't take me all the way. -V.S. Naipaul, from Reading & Writing

Slope Tectonics Michel Jaboyedoff, 2011 Usually geomorphology, structural geology and engineering geology provide descriptions of slope instability in quite distinctive ways. This new research is based on combined approaches to providing an integrated view of the operative slope processes. 'Slope Tectonics' is the term adopted here to refer to those deformations that are induced or fully controlled by the slope morphology, and that generate features which can be compared to those created by tectonic activity. Such deformation can be induced by the stress field in a slope which is mainly controlled by gravity, topography and the geological setting created by the geodynamic context. The content of this book includes slope-deformation characterization using morphology and evolution, mechanical behaviour of the material, modes of failure and collapse, influence of lithology and structural features, and the role played by controlling factors.

Issues in Political Theory Catriona McKinnon, 2019 This political theory textbook invites students to apply the concepts they encounter to real world politics. Each chapter includes a 2000 word case study to highlight the theories that have been discussed.

Probability and Statistics Michael J. Evans,Jeffrey S. Rosenthal,2004 Unlike traditional introductory math/stat textbooks, Probability and Statistics: The Science of Uncertainty brings a modern flavor based on incorporating the computer to the course and an integrated approach to inference. From the start the book integrates simulations into its theoretical coverage, and emphasizes the use of computer-powered computation throughout.* Math and science majors with just one year of calculus can use this text and experience a refreshing blend of applications and theory that goes beyond merely mastering the technicalities. They'll get a thorough grounding in probability theory, and go beyond that to the theory of statistical inference and its applications. An integrated approach to inference is presented that includes the frequency approach as well as Bayesian methodology. Bayesian inference is developed as a logical extension of likelihood methods. A separate chapter is devoted to the important topic of model checking and this is applied in the context of the standard applied statistical techniques. Examples of data analyses using real-world data are presented throughout the text. A final chapter introduces a number of the most important stochastic process models using elementary methods. *Note: An appendix in the book contains Minitab code for more involved computations. The code can be used by students as templates for their own calculations. If a software package like Minitab is used with the course then no programming is required by the students.

Principles of Management David S. Bright,Anastasia H. Cortes,Eva Hartmann,2023-05-16 Black & white print. Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management

areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Ethics in Public Health Practice in India Arima Mishra, Kalyani Subbiah, 2018-10-10 This edited volume draws on ten original contributions that locate ethics at the centre-stage of public health practice. The essays explicate ethical issues, challenges, deliberations and resolutions covering a broad canvas of public health practice including policies, programmes, research, training and advocacy. The contributors are academics and practitioners in varying roles and long-standing engagement with public health in diverse settings within India. Their expertise in disciplines range from anthropology, sociology, health communications, gender studies, economics, epidemiology, social work and medicine. Their chapters deal with dimensions of ethical dilemmas that can rarely be defined and contained within ethical guidelines and protocols alone. Instead, they throw light on the associated factors, value systems and contexts in which such complexities occur and require response or redressal. This volume aims to articulate the growing awareness among practitioners that public health ethics is not merely an advanced grouping of possible problems and solutions. It hopes to facilitate robust platforms for dialogue and debate on the subject through the lenses of these contributions. The book is conceptualized to reach broader audiences such as public health practitioners and researchers in several roles within Government health systems, NGOs/Grass root

organizations/CSR initiatives/advocacy groups; as well as researchers in academic settings and facilitators involved in teaching ethics and imparting training for students and young practitioners of public health.
