### **Self-directed learning research and its impact on educational practice** Elsa Mentz,Roxanne Bailey,2021-05-17

This scholarly book is the third volume in an NWU book series on self-directed learning and is devoted to self-directed learning research and its impact on educational practice. The importance of self-directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised. The target audience does not only consist of scholars in the field of self-directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors. The book contributes to the discourse on creating dispositions towards self-directed learning among all learners and adds to the latest body of scholarship in terms of self-directed learning. Although from different perspectives, all chapters in the book are closely linked together around self-directed learning as a central theme, following on the work done in Volume 1 of this series (Self-Directed Learning for the 21st Century: Implications for Higher Education) to form a rich knowledge bank of work on self-directed learning.

**Open Educational Resources** Unesco,2009 Education systems today face two major challenges: expanding the reach of education and improving its quality. Traditional solutions will not suffice, especially in the context of today's knowledge-intensive societies. The Open Educational Resources movement offers one solution for extending the reach of education and expanding learning opportunities. The goal of the movement is to equalise access to knowledge worldwide through openly and freely available online high-quality content. UNESCO has contributed to building global awareness about Open Educational Resources, through facilitating an extended conversation in cyberspace. Over the course of two years, a large and diverse international community came together in a series of online discussion forums to discuss the concept of Open Educational Resources and its potential. In making the background papers and reports from those discussions available for the first time in print, this publication seeks to share even more widely the contributions made by so many. It is intended for all who may be intrigued by the Open Educational Resources movement - its promise and its progress.

*Implementing Inclusive Education* Richard Rieser,2012 This revised and expanded second edition of *Implementing Inclusive Education* shows how Commonwealth countries are attempting to undertake inclusion in education, and will encourage all those charged with ensuring education for all to make certain that disabled children are fully included in all

aspects of the education system.

**Education Policy Reform Trends in G20 Members** Yan Wang,2014-01-17 G20 members bring together the world's major advanced and emerging economies, as well as the European Union. Together they represent some 90% of global GDP, 80% of global trade and two-thirds of the world's population. In recognition of educational development as a key driver of economic development, the G20 members have put education reform high on their policy agenda in order to meet the challenges and embrace the opportunities ahead. Their experiences and lessons in education reform will not only showcase the global trend of education development, but also will provide valuable reference and inspiration for undertaking education reform to advance national development in China as well as other countries. This book documents recent policy reform in G20 members' systems, showcases the global trends in education policy, serves as a valuable reference tool and also provide inspiration for undertaking education reform to advance development in related countries.

**Curriculum Implementation** Michael Fullan,Paul B. Park,1981

**Primary Education in Crisis** Brahm Fleisch,2008 In the past decade, the national preoccupation has been on the crisis in secondary schools. Lurking behind the intractable problem of low pass rates, the dysfunctional schools and the small number of higher grade mathematics and science graduates is the calamity in primary education. Drawing on the work of researchers in a range of fields including psychology, sociology, anthropology, linguistics, economics, the health sciences, and mathematics education, this book documents the depth and scope of the primary education crisis and provides a comprehensive and rigorous explanation of its causes. Primary education in crisis pulls together the wealth of research on health, poverty, resources, language and teaching as factors in academic achievement in reading, writing and mathematics. At the centre of the book is an analysis of the published studies that systematically document what teachers teach and fail to teach, and why it is that teaching is at the heart of the crisis in primary education. The author suggests that there are no quick fixes, but only hard choices and that, for reform to succeed, it must be evidence-based.

*Life Orientation* Juta Academic,2011-12-01 This book was developed in order to deliver a unit standards-based curriculum that is in line with the National Qualifications-Framework (NQF).

*Inclusion, Equity and Access for Individuals with Disabilities* Santoshi Halder,Vassilios Argyropoulos,2019-03-02 The book provides multiple perspectives and insights on the area of Inclusion, Equity and Access for people with disabilities and brings together various inclusive effective practices from 21 countries across the world most comprehensively in one book. The book documents perspectives from educational researchers and teacher educators through first-hand experience using cutting-edge research and conceptual understandings, thought processes, and reflections. The book brings together various methodologies to expose scientific truths in the area of disability and inclusion. Chapter authors utilize a self-reflective stance, representing state of the art theory and practice for exploring notions of disability. Authors examine cultural

relational practices, common values and beliefs, and shared experiences for the purpose of helping cultural members and cultural strangers better understand interdependent factors. Each chapter is an attempt to unravel a thought provoking, comprehensive, and thorough understanding of the challenges and abilities of individuals with disabilities shaped by their own culture, society and country, re-engaging the promise of scientific research as a generative form of inquiry. The book is designed to be of use to a wide range of professionals; researchers, practitioners, advocates, special educators and parents providing information and or discussions on educational needs, health care provisions, and social services irrespective of country and culture.

**Understanding and Developing Science Teachers' Pedagogical Content Knowledge** J. John Loughran, Amanda Berry, Pamala Mulhall, 2006-01-01 There has been a growing interest in the notion of a scholarship of teaching. Such scholarship is displayed through a teacher's grasp of, and response to, the relationships between knowledge of content, teaching and learning in ways that attest to practice as being complex and interwoven. Yet attempting to capture teachers' professional knowledge is difficult because the critical links between practice and knowledge, for many teachers, is tacit. Pedagogical Content Knowledge (PCK) offers one way of capturing, articulating and portraying an aspect of the scholarship of teaching and, in this case, the scholarship of science teaching. The research underpinning the approach developed by Loughran, Berry and Mulhall offers access to the development of the professional knowledge of science teaching in a form that offers new ways of sharing and disseminating this knowledge. Through this Resource Folio approach (comprising CoRe and PaP-eRs) a recognition of the value of the specialist knowledge and skills of science teaching is not only highlighted, but also enhanced. The CoRe and PaP-eRs methodology offers an exciting new way of capturing and portraying science teachers' pedagogical content knowledge so that it might be better understood and valued within the profession. This book is a concrete example of the nature of scholarship in science teaching that is meaningful, useful and immediately applicable in the work of all science teachers (preservice, in-service and science teacher educators). It is an excellent resource for science teachers as well as a guiding text for teacher education.

**Mathematics and Science Achievement at South African Schools in TIMSS 2003** Vijay Reddy, 2006 This monograph reports on South Africa's performance in TIMSS 2003 relative to 50 other countries; describes the performance of different groups of learners in South Africa; and provides contextual information about teachers, schools and the curriculum. The report concludes with recommendations for strategic interventions to improve South African learners' performance in mathematics and science. The findings contained in this report offer valuable insights to academics, policymakers, curriculum-planners and teachers and those involved in the development of education in South Africa.

Duncan,2011 This book includes within its scope theoretical and applied issues including ethical theory, as well as moral, social, political, and legal philosophies. Topics discussed herein include gender and ethics in qualitative interviewing; cognition, consciousness and business ethics; a philosophical perspectives on the labour/trade link; corruption in public and private organisations; environmental ethics; and biomedical ethics.

*Sydney Academy of Chess: Workbook 1* Sydney Academy of Chess,2012-03-06 A beginners chess workbook aimed at primary school children. Lessons and diagrams followed by questions on each topic. Covers all the rules of chess and chess tournaments, basic checkmates and the concept of piece values and trades.

Regulating Telecommunications in South Africa Charley Lewis,2021-06-25 This book provides the first full account of the 20-year story of universal access and service in South Africa's ICT sector. From 1994 the country's first democratic government set out to redress the deep digital divide afflicting the overwhelming majority of its citizens, already poor and disenfranchised, but likewise marginalised in access to telephone infrastructure and services. By this time, an incipient global policy regime was driving reforms in the telecomms sector, and also developing good practice models for universal service. Policy diffusion thus led South Africa to adopt, adapt and implement a slew of these interventions. In particular, roll-out obligations were imposed on licensees, and a universal service fund was established. But an agency with a universal service mandate was also created; and licences in under-serviced areas were awarded. The book goes on to identify and analyse the policy success and failure of each of these interventions, and suggests some lessons to be learned.
